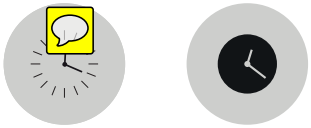
En este documento se presentan una serie de propuestas para los iconos de la plataforma, donde pueden variar tonos dependiendo del estado, se pueden combinar tiempos, porcentaje, etc.

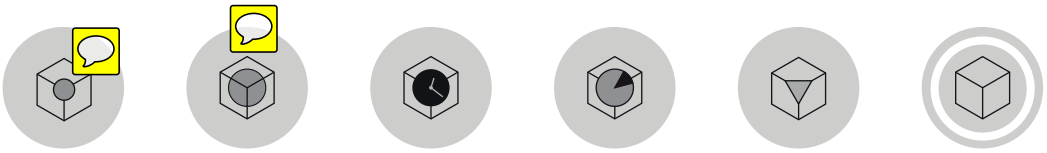
1. Time / Date

This report represents activity observed Monday–Friday, between the hours of 7:00am–6:00pm ET. Labor Day was excluded.



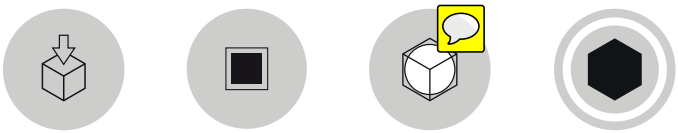
2. Occupancy

This measures states whether there was anyone at all using the seat, the room, the setting, or 2E as a whole. Percentage of time a room is occupied.



3. Capacity

Maximum capacity of room



4. Utilization

The percent of seats in the room or setting that are filled, given that it is occupied. Percent capacity seated, when room is occupied.

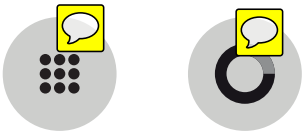
Note: Utilization for individual desks is calculated as if they were all in one large room. Treating individual desks as their own entity would result in 100% utilization when one person uses that one seat, which is not useful information.

5. Designed ft. 2 per person:

This is total square feet divided by the number of people assigned to a space or the number of seats in a room.

6. Efficiency Metric

Square feet per the actual average number of people using the space.



7. Visit

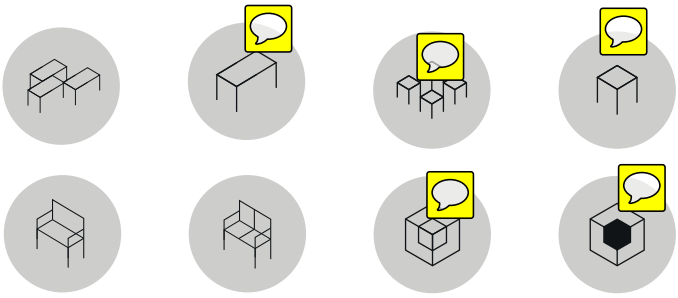
Must calculate # of visitors per antenna

11. Booking

Must calculate entry and departure time (check-in and check-out)

12. Type of places

According to Steelcase Interconnected Wrokplace, space is divided in:
We:Owned (Project Team Spaces, Shared Project Spaces)
I:Owned (Workstations and Private Offices)
We:Shared (training rooms, Café Spaces, Collaborative Spaces)
I:Shared (touchdown spaces, enclaves)



13. Surveys

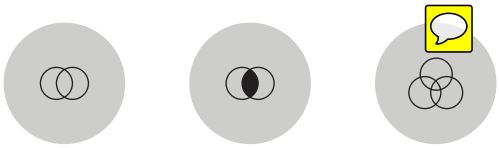
Surveys answered by volunteer people who wear tags. This way we collect feedback related to the space directly from the user

14. Size

Must record space size in m2 (squared meters) in order to determine how many meters are being used and how many aren't used (space efficiency, related to Real Estate) circulations (aisles) must be calculated also during an implementation

15. Interaction

The increased face-to-face and informal communication has had a significant impact on the amount and quality of interaction and connectivity between individuals and teams.

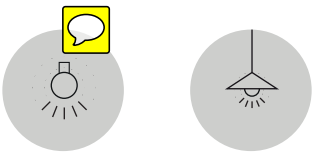


16. Physycal Conditions

Webpage must have a photo per zone in order o have/make a better analysis about space conditions- related to wellbeing.

17. Thermal comfort

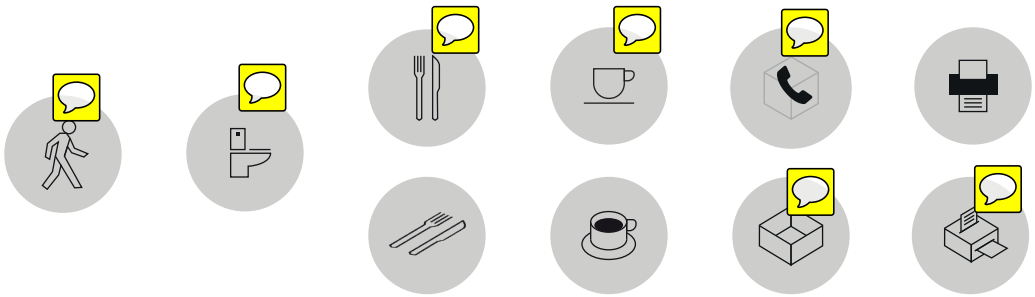
18. Lighting



19. Noise

20. Walking distance to

Toilets
Food
Coffee
Phone call space
Private space
Printers

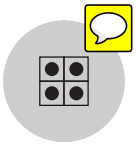


21. Visual Privacy

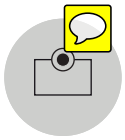
22. Space Primary Purpose

23. Capacity (seats)

24. Capacity (m2/user)



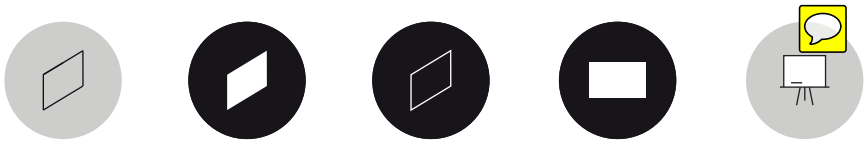
25. Telepresence



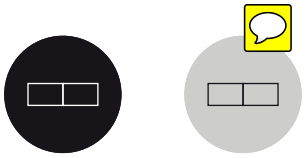
26. Conference phone

27. Projector

28. Whiteboard

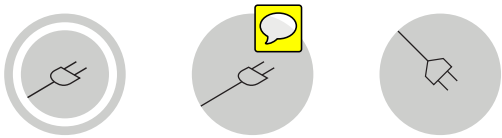


29. Media:scape



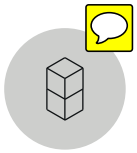
30. Number of screens

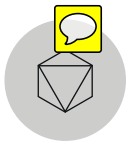
31. Electric plugs



32. Space ID

33. Floor





34. Space name
